New Premier Elite Mobile Apps

Texecom
Designed to Perform

Texecom launches new Android apps for Premier Elite security systems.

Premier Elite control panels can now be remotely controlled by smartphone, thanks to 3 new Android apps released by Texecom. The 3 apps offer end-user, master user and system engineer functionality:

SmartKey App

Emulating Texecom's acclaimed wireless SmartKey interface, the SmartKey app provides end-users a simple, intuitive interface to arm, part arm, disarm and trigger up to 3 programmable outputs.

Keypad App

The Keypad app emulates a Premier Elite keypad interface. This allows end-users, master users and engineers the ability to remotely control the alarm system, as if physically standing in front of an actual keypad connected to the system. The SmartKey app is also contained within the Keypad app.

Engineer App

The Engineer app contains all the functionality of the Keypad app with added system engineer diagnostics and commissioning tools. Panel status, zone status, event log* and remote anti-code reset functions make this a valuable engineering tool.

All of the applications are supported in multiple languages and are available to download from the Google Play store now**

System Requirements

All of the applications require a mobile device running Android V2.2 and above.

The mobile apps are compatible with Premier Elite control panels V1.00 and above and Premier 48/88/168 control panels V8.14 and above.

Connectivity to the control panel requires IP or GPRS communications. It is recommended that installers are experienced in configuring IP or GPRS systems before attempting to use Texecom mobile apps.

One of the following communication devices is required to enable mobile app connectivity:

Premier Elite ComGSM (running in GPRS mode with a fixed IP address SIM card)
Premier Elite ComIP
Chiron IRIS communicator***

Texecom are committed to providing superior security solutions and enhanced functionality. We will be continuing to develop these apps, adding features and increasing platform availability. We would love to hear your feedback, please send any comments or queries to apps@texe.com.
