ACTWinPro 1.0 Installation Manual

1. Please check that your PC meets the minimum system requirements for ACTWinPro. (Please find the requirements attached to this document)

2. You must have Administrator rights on the PC to install and configure ACTWinPro. (In Domain environment you must have the Domain Administrator rights).

3. Please make a backup copy of your existing database and uninstall any previous version of ACTWinPro (if any).

4. Insert the ACTWinPro CD and follow the installation instructions:

InstallShield Wizard		×
	Welcome to the InstallShield Wizard for ACTWinPro	
	The InstallShield® Wizard will install ACTWinPro on your computer. To continue, click Next.	
	< Back Next> Cancel	

5. Restart your PC (if required).

6. Create a folder on a PC or file-server that will host the database. If you are using NTFS partition you must set 'Full control' permission to 'Everyone'. To set the permissions please go to Security tab of the folder properties:

IDatabase Properties		Ĩ

9. Create a new ACTWinPro database in the shared folder:

Browse and select the PC and folder that you have created in step 6.

My Network Places	
My Network Place Intre Network Place Intre Network Interesting </th <th>es ork t Terminal Services t Windows Network Konstantin ACTDatabase</th>	es ork t Terminal Services t Windows Network Konstantin ACTDatabase
<[

Give a name to the new database:

Create New Data	base					? ×
Save jn:	🧟 ACTDatabas	e on Konstantin	•	+ 🗈 💣	*	
My Computer						
SYSTEM (C:)						
WDNTFS (D:)						
My Documents						
(
My Network	File <u>n</u> ame:	MainSite			<u>S</u> av	/e
110003	Save as type:	ACTWinPro Data	base (*.awp)	•	Can	cel
		🔽 Use datab	ase creation wiza	ard		

10. Use the database wizard to configure the basic database settings. Check the communication settings and make sure they match the hardware configuration you have.

11. Once you have finished with the database creation you should be able to connect to your site from the local PC.

12. Install ACTWinPro on the second PC. Reboot the PC, if you are asked to do so.

13. To open the shared database simply go to File->Open and browse your network for your shared folder created in step 6 (you must know the PC name on which the database is located).

14. You might need to adjust your SiteServer security settings on both PCs. To do so please go to Options->SiteServer tab and change your settings:

	vante	A	arm/Colours
General	Installation		Controllar's Security
Database	Installation	SiteServe	Controller's Security
Norma Norma SiteServer SiteServer The Ir	I (any user on the conly authentica Launch Identity- teractive User (re	e LAN can get ated domain us quires somebo	access) ers can get access) dy to be logged on)
C The L	aunching User (or	nly one user at	a time can connect)

15. Now you should be able co connect to your site from the second PC.
