ACT Web

ACT
Access Control Technology

ACTWeb is a web based interface that allows you to manage the basic functions of the access control system, including user lists, reports and enrolled cards.

It has been developed for use in combination with the ACTWin pro PC application (2.5 or later).

Main Features

- Web based interface

- user friendly, intuitive software

- 24 hour access to your software from Internet Explorer

- contains a comprehensive help database

- does not require the installation of any plug-ins or software

- does not require a high spec'd PC

- maintenance and software updates are done from the server and not on users workstations making it easier to deploy and manage

Main Functions

- Manage Users

- Add Users

- Reporting - see list of available reports
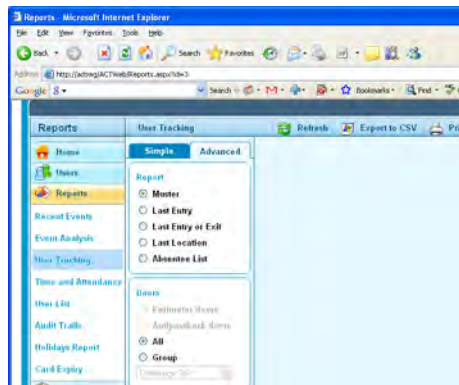

- Add Cards

Available Reports

- Recent Events

- Event Analysis

- User Tracking

- Time & Attendance

- User List

- Audit Trails

- Holiday Report

- Card Expiry

PC Requirements

The minimum requirements for ACTWeb are Microsoft Windows Server 2003 and Microsoft SQL Server 2005.
