Keyless entry controls for Adams Rite deadbolts, deadlatches and exit devices

The A100 is a unique keyless entry control for Adams Rite deadbolts, deadlatches and exit devices that are compatible with aluminum stile applications. The A100 offers all the benefits of keyless security, along with Aperio™ technology providing an innovative new approach to online access control. With Aperio technology, you can quickly upgrade a mechanical door to an electrified access control door without the cost and inconvenience of wiring the door, greatly improving the security level of the premises.

Redefining wireless access control

Aperio Technology

- Minimal field configuration for quick, easy wireless deployments that eliminate the cost and inconvenience of complex wireless site surveys
- Fully-encrypted AES 128 wireless communication between the A100 lock and Aperio hub; high security standardized communications ensures data security
- Global Aperio technology is ideal for companies who wish to deploy a standard infrastructure across multi-national locations
- Available across a range of locking hardware from ASSA ABLOY Group brands, Aperio provides the flexibility to address a variety of applications throughout your facility.

How to Order the A100

- The A100 is available in several models which are compatible with most aluminum door deadlatches, deadbolts and exit devices. Check existing door hardware before ordering to ensure the correct model is selected.

A100 Features & Benefits

- The glass and aluminum entrance solution
 - Suitable for Adams Rite deadlocks, latches, and exit devices
 - Also compatible with select Sargent, Yale, and Corbin Russwin exit devices
