AC-HOST
Embedded Server

DESCRIPTION

The AC-HOST is a Linux-based embedded server that is used as a host for an Essential license of the AC Nio management software. The AC Nio Essential license can manage an AC Series system of up to 40 doors and cameras. It does not support systems with the ACS-ELV or ACS-IO starter kits, nor does it allow partitioning.

FEATURES

• Remote web-based management

• Compact form factor

• Supports applications of up to 40 doors

SPECIFICATIONS

CPU:	Broadcom BCM2711BO quad-core A72 @ 1.5 gHz
RAM:	2 GB LPDDR4 SDRAM
Storage:	16 GB microSD, A1 rated
Ports:	2 USB 3.0, 2 USB 2.0
Network:	Gigabit Ethernet
Protocols:	IPv4, IPv6, TCP, UDP, HTTPS
Dimensions:	4-1/2" H x 4-1/2" W x 1-1/2" D
