AC-PC-40

AC-PF-40

AC-PT-40

DESCRIPTION

Aiphone 40-bit credentials come in three different form factors. A clamshell proximity card, a key fob for attaching to a keyring, or an adhesive backed disc for attaching to a personal item.

The AC-PC-40 is a clamshell ABS 125kHz proximity card. The card has a 6" read range from card to reader.

The AC-PF-40 is a ABS 125kHz proximity key fob. The key fob has a brass ring to attach it to a keyring. The key fob has a 4" read range from fob to reader.

The AC-PT-40 is an adhesive backed PVC, small form factor 125kHz proximity disk tag. The adhesive backing allows the disk to attach to an existing ID card, smart phone, wallet, or similar personal item. The disk has a 3-1/2" read range from disk to reader.

FEATURES

• Aiphone 40-bit format

• Site code and card number printed on credential

• Frequency 125kHz
