

## SYMMETRY INTEGRATED VIDEO SERVERS 8, 16 AND 24 PORT

Symmetry Integrated Video Server all-in-one units include PoE+ switch (8, 16, and 24 port), video storage (up to 40 TB), and software able to scale from a single unit to 1,000s of appliances to provide for a secure, enterprise class, distributed video surveillance architecture. Just add cameras for a fully capable, enterprise class video surveillance solution, that can operate standalone (unit provides up to 4K resolution monitor output) or as an integrated Symmetry solution. Providing an added layer of security, all Symmetry Integrated Video Server appliances come setup out of the box with an internal VLAN to provide segmentation of traffic and eliminate direct accessibility of devices (cameras, encoders, etc.).

Integrated Video Servers come fully licensed to match the number of available PoE ports (8, 16, or 24) with Symmetry CompleteView 20/20 Pro video software. In addition, units include 3-year warranty and 3-years of Symmetry CompleteView software updates at no additional cost.
