

Apollo APACS Pro

Windows NT™ Multi User Access and Alarm Management Program

The APACS 100 Pro NT Windows NT™ based **network** alarm/access management system provides an easy and user friendly environment for operating and processing of access and alarm information when used with AAM-20, AAM-80, or AAN-100 type multiplexers. When installed, up to 32 Windows 95/NT™ workstations can be assigned to operate the system. **The APACS PRO includes alarm colorgraphics maps, video badging, and basic time and attendance at no extra cost.**

The APACS PRO provides support for up to 16,320 readers (various reader technologies), 128 access levels, 128 time zones per controller with 6 intervals per time zone as standard.

The APACS PRO program supports configuration of all field devices, access levels and time zones. These parameters are downloaded to the AAM, AAN-100, or the AP-500 downloadable reader over the communication link. Additional user defined database fields can be entered by the user to provide supplemental cardholder information.

The APACS PRO supports on-line logging of access and alarm events when connected to the AAM or AAN controllers. Upon establishment of communications, the controller sends all buffered access and alarm events to the PC. The program stores the events on disk and formats them for later recall or for the logging at the selected printer. The APACS PRO program provides recall of stored events. Events can be retrieved by access type, alarm type, card number, cardholder, date/time, and reader.

The AAM/AAN controller, with the APACS PRO, provides complete flexibility in allowing field configuration of card and database formats.

The APACS 100 program provides the following user-configured features:

- Windows NT™ multi-user operating environment
- TCP/IP protocol/Network support
- Supports up to 32 Windows 95™ or NT™ workstations
- Cardholders/event storage are only limited by disk capacity
- Time activated reader modes
- 2 card control/2 man control
- Elevator control/CCTV interface
- Integrated graphic map display included
- Integrated badging included
- Basic time and attendance included
- Recall of events over a user defined time interval
- Alarm zone grouping/group arming/disarming
- Inputs to outputs linkages
- Live video verifications
- Actions to keyboard assignments
- Database segmentation
- On screen reader control in alarm mode
