

EV669

360° Ceiling Mounted PIR

Where greater range or installation flexibility is required, the EV 669 offers 360° of protection with 18 curtains of 10m radius and with mounting heights of up to 5.0m. Fully programmable with electronic selection of either 180° or 360° coverage patterns, bi-curtain processing and memory control, this fully programmable PIR is ideal for commercial or industrial applications.

EV 669 – 10m radius, 360° coverage, NC relay, alarm memory, selectable detection patterns
