

AVIGILON

## Analog Video Encoder with High Definition Stream Management (HDSM)

### Key Features

- Flexibility
- High Image Rates
- High Definition Stream Management (HDSM)
- PTZ Support
- Alarm Input and Outputs
- Power-over-Ethernet (PoE)
- Plug-and-Play
- Easy to Install

### Benefits

- Supports NTSC and PAL video standards and Composite, Component, and S-Video formats
- Record up to 30 IPS at 4CIF resolution from each port for a total of 120 IPS from all 4 ports
- Highest possible quality recording with no loss of data and dynamically controlled bandwidth utilization for optimal streaming.
- RS-485 Port available for controlling standard PTZ units within Avigilon Control Center
- Synchronize recording with external alarms and integrate camera motion detection into your current alarm system
- No external power required for the encoder
- Auto-detection and auto-configuration of encoders for easy installation
- Rackmount kit allows 3 encoders, for a total of 12 analog cameras in 1U of rackspace

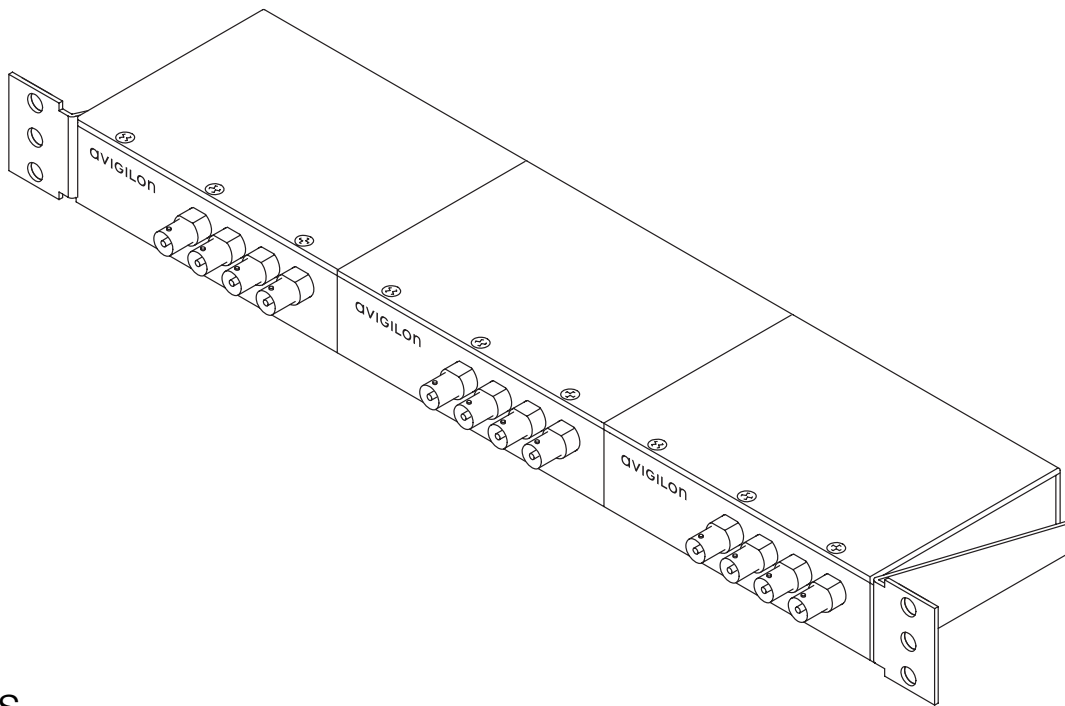

# Analog Video Encoder with High Definition Stream Management (HDSM)

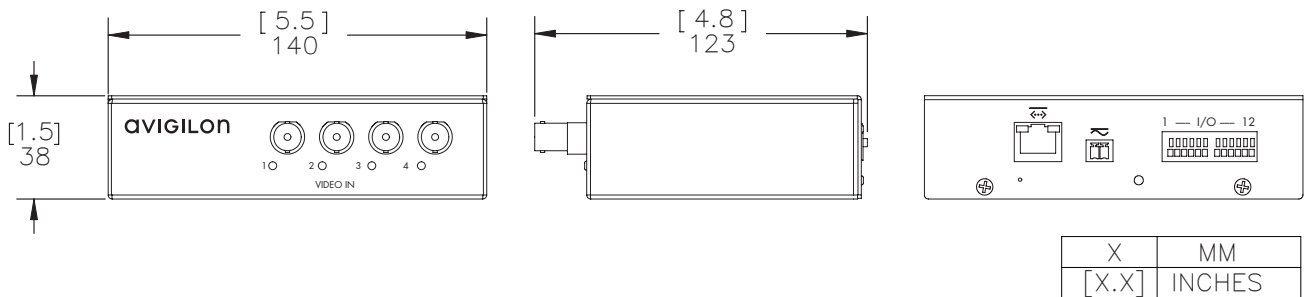

Model	Pixel Layout	Maximum Images Per Second	Number of Ports	Video Standard	Image Type	Recommended Application
ENC-4PORT	up to 720 x 576	120 ips	4	NTSC or PAL	Color or Mono	Integrating legacy analog cameras into Avigilon Control Center.

## 1U Rackmount Bracket

( Model: ENC-BRK1U )
