DS 7240
security control panel.

The DS 7240 security control panel employs state-of-the-art technology for protecting small and medium-sized properties, both commercial and private. It signals an alarm in the event of burglaries, fires or technical faults.

The DS 7240 is a complete control unit/communicator offering a wide range of functions for all aspects of security management and also gives you numerous high-convenience features.

The DS 7240 security control panel has up to 20 freely programmable outputs and user profiles for up to 32 user. Four separate arming zones ensure you can also create complex security solutions. What's more, you can also define eight alarm zones (can be expanded up to 40), including a fire alarm zone for optical smoke detectors or heat detectors.

The modular design allows you to expand at your own speed, protecting your investment well into the future. Both wired and wireless components can be connected. An integrated dial-up section linked to the telephone network allows cost-effective remote uploads/downloads. The same applies when linking up to monitoring centers.

An overview of the DS 7240 security control panel.
· Extensive range of functions
· Unrivalled price/performance ratio
· Dial-up section with link to the telephone network
· Up to 32 user profiles
· 8 to 40 alarm zones
· Easy operation, ergonomic keypad
· Remote upload/download
· Bosch know-how and service ensure your investment retains its value
· Numerous connection options
· Easy to scale up

Security you can rely on.

BOSCH

Technical Data	
Operating Voltage	230 V, 50 Hz
Battery charging current	1.4 A
Battery capacity	max. 12 V / 18 Ah
Free programmable outputs	resistant to short circuit
- Number of OC outputs	3 (1 under surveillance)
- Max Voltage	11.5 V DC to 12.4 V DC
- Max current (closed contact)	600 mA
- Max current (alarm)	1850 mA
- Relais output	1 (normally-closed contact)
- Contact rating	30 V / 3 A
- Expansions	2 octal output modules
Event log	254 events
Number of alarm areas	4
Number of users	32
Internal dialer	analogue PSTN
- formats	ContactID, SIA 300, paging
Environmental conditions	
- Operating temperature	0° C to 50° C
Housing	
- Size (h x w x d)	318 x 368 x 76 mm
- Color	light grey
Part number	4.998.121.475
