

WSS-4E- ZBS

Smart programmable Scenario Switch

Connect Your Home to Zigbee Home Automation World

- Easy installation – no wiring required
- Simple and modern design fits in with any home décor
- Expansion of home automation options

WSS-4E- ZBS is a Zigbee programmable scenario switch designed to easily trigger a pre-programmed scenario. This smart scenario switch can include up to four scenario conditions and you are free to create your favorite scenario conditions at different occasions. The scenario conditions govern the behaviors of lights, garage door, window shadow or other devices connected to ZigBee home automation or security systems. Your home can be fully controlled at one touch.

The battery-operated WSS-4E- ZBS requires no additional wiring and it is ideal for the expansion of home automation options in new or modern home where cabling solution are limited.

Features

- Facilitate the use of 4 pre-programmed scenario conditions
- Two-way communication
- Compatible with any Zigbee networks and devices
- LED indicator light makes it easy to find in the dark
- No wiring required
- Install quickly and easily
- Simple and modern style
- For indoor use only
- CE/FCC compliance
