

Conway External Wall and Ceiling Mounted Housings EHC4, EHW4 and Corner Kit

The Conway range of external camera housings is designed specifically to provide an environment for camera and lens assemblies that is safe from interference and the weather. The housing also gives the added advantage of hiding cables and wires that might be unsightly in many situations.

The camera mounting assembly has been designed to cope with most major cameras on the market. It has the ability to take top or base mounting cameras and the removal of one part of the assembly will allow the housing to be mounted on a wall either left or right facing.

The EHW4 is designed to allow the camera and lens to look directly out from a wall or flat vertical surface. A small amount of side-to-side adjustment is possible (approx. 20 degrees). Vertical adjustment (approx 60 degrees) is also possible.

Optional

- The CK is a corner mounting unit made for the EHW4 which allows the unit to be fixed in a 90 degree corner.
- Heater, please specify voltage when ordering.

Special Finishes At Conway we manufacture all of our products at our factories in High Wycombe and are therefore able to apply special colour finishes to customer specifications.

Vandal resistant construction

Manufactured to IP65

*Available in 304
stainless steel*

*Manufactured from stainless
steel (3CR12)*

Corner Kit available for EHW4

*Finished in morning mist
BS10A03 as standard*
