

Instruction

The water leak sensor is specifically designed for smart home applications in areas prone to water leaks. This sensor is compatible with Zigbee 3.0 technology. It can be conveniently placed on the floor in sensitive areas. Whenever water immersion is detected, the sensor promptly sends an alarm signal to the smart hub.

Water Leak Sensor

Key Features

- Standard ZigBee 3.0 protocol, good compatibility;
- Highly sensitive sensor and intelligent early warning
- Easy to Install and Set up
- Stay Connected and guard family 24*7
- Standard international IP66 for waterproof and dustproof protection.
- Undervoltage alarm support;

Technical Parameters

- Model Name: MIR-WA100-TY
- Wireless Technology: ZigBee
- Working Voltage: DC 3V (CR2032 battery)
- Transmission Frequency: 2.4 GHz
- Detection Method: Water Sensor Probe
- Water Proof Level: IP66
- Working Temperature: -10°C to +55°C
- Low Battery Indication: Yes
- Battery Life: More than one year (20 times per day)
- Dimension: ϕ 50 x 18 mm
