WinStart / WinStart SQL

WinStart / WinStart SQL - Starter / Update Kit

The WinDSX Starter/Update Kit consists of: 1-WinDSX Software CD, 1-Tech Binder and 2-WinDSX User Guides. This version uses Microsoft Access™ for the DataBase engine. This version of Software does not require the use of a DSX Features Key but any Advanced Features will.

The WinStart SQL Starter/Update Kit consists of: 1-WinDSX SQL Software CD, 1-Tech Binder, 2-WinDSX User Guides and a USB Features Key. The WinStart SQL uses Microsoft SQL Server as the database engine. NOTE: Does not include Microsoft SQL Server™ This product requires advanced configuration. The Dealer or End User must have a Microsoft SQL Server Administrator to install, configure, and maintain the SQL Server on site. The WinStart SQL Software CD contains both the Access and SQL Versions so that the Access version can be updated prior to migrating the database to the SQL Server.

A Tech Binder is given to each dealer when they come to DSX for their initial training. To ensure you always have a copy of the current Software, Documentation, and User Manual to leave with the customer, order a WinStart for each new job.

The Tech Binder contains the following documents:

- 1022/1030/1040 Series Hardware Installation Manuals
- 1022/1040 Quick Reference Cards
- Comm Server/KeyMon as a Service
- Stacked Device Types
- DSX Site Survey
- WinDSX System Specification
- PC Requirements
- Preventive Maintenance Checklist
- DataBase Program Sheets
- RMS1076 UL Manual
- Software Installation Manual
- WinDSX FAQs
- WinDSX User Manual
