SNC-B2315P IP Cameras

1/3" CCD Colour/B&W Network Camera, WDR, 540L

### **FEATURES**

- MPEG-4 & M-JPEG compression modes (max. 25 fps)
- Video motion detection and pre/post-alarm buffer
- Easy Network Setup such as UPnP function, DDNS
- WDR function, Day/Night function with removable IR cut filter
- 540/570 TVL Horizontal Resolution
- Privacy Zones
- Accepts 2 types of auto iris lenses (DC/Video)
- Bidirectional Audio Support
- Power Input AC24V/DC12V and PoE

### **SUMMARY**

The SCC-B2315P day/night IP camera series incorporates the 1/3" 470,000 pixels CCD and as such can operate 24 hours a day by automatically switching to colour mode during the day and black and white (B/W) mode at night with moving filter technology. It employs the SONY CCD and utilizes a superior Digital Signal Process to supply sharp images of high resolution. Under illumination higher than a certain level, it provides outstanding color images in colour mode and clear images in B/W mode under low level illumination. The camera utilizes the low light function that incorporates the AGC function and low-speed shutter, so that along with the Day/Night function, it can represent clear images even under diffused conditions such as dimly lit parking lots or building interiors. Its exceptional BLC (Back Light Compensation) function ensures perfect backlight compensation effect every time by allowing the user to setup five preset zones, positions or sizes for the object darkened by backlighting.

In addition, it can be applied for various purposes since it has a Motion Detection function, a Camera ID indication function that indicates the camera ID up to 20 digits, a Digital 10x zooming function, etc. By adopting the ELC function, it can use the manual Iris lens economically. Without ELC function, it can use the automatic lens of DC type or video selectively.
