

PRO-WATCH® NVR

64/128/256-Channel Enterprise NVR

Pro-Watch NVR is a flexible, scalable and open IP video surveillance system, including the Pro-Watch NVR PE/HE with 64 to 256 channels as well as a software based solution.

Supporting Honeywell's high definition (HD) cameras and broad integration with third party IP cameras and encoders, the Pro-Watch NVR family is a powerful HD IP recording and security monitoring system for a variety of applications.

OPEN – BROAD DEVICE INTEGRATIONS

Integrates to full line of Honeywell IP cameras and encoders. Support for ONVIF Profile S and Profile G, PSIA, real time streaming protocol (RTSP) and multicast standards and Honeywell native device integrations supporting equiP® Series cameras' new features: 4K resolution, H.265 video compression codec, 3D PTZ control,

360° camera, multi-imager camera support, intelligence events and bounding boxes on objects detected by specific video analytics.

Native device integrations supporting 60 Series, 30 Series cameras' new features: H.265 smart video compression codec and encrypted video stream with TLS 1.2.

SCALABLE INTEGRATED SECURITY SOLUTION

Multiple Pro-Watch NVRs can be deployed for system expansion using a distributed architecture and are integrated with the Pro-Watch VMS enterprise video management system with Integrated Security Suite.

The whole Pro-Watch NVR products contain no content or material from any companies or their subsidiaries prohibited under US National Defense Authorization Act (NDAA) Section 889 and can be used as part of video

systems which comply with NDAA Section 889.

EFFICIENT MONITORING AND INVESTIGATION

Pro-Watch NVRs provide quick camera drag-and-drop connection for seamless live view experience. They support GPU acceleration for smooth 4K and 1080p 60 fps rendering.

The number of false alarms are reduced with SMART VMD, object based motion detection analytics.

They include smooth reverse playback for real-time investigation of incidents and SMART Motion search for fast and efficient forensic search and investigation of objects/motion on recorded video using Client PC without impacting the NVR Server load.

The clips are exported in an Encrypted proprietary format (*.smpvc) with user password protection.
