

# Biometric Access Control Products

## Quick Reference

### HandKey® II Part Number: HK-2-F3

- Field-proven hand geometry technology
- Stand-alone, Wiegand or network capability
- Each reader capable of up to 32,512 individual users
- Integrated proximity and smart card reader options
- Indoor and outdoor versions available
- Optional Windows-based, networkable access control software
- BioCote® antimicrobial agent is applied to the platen of each unit
- A blue hand outline printed on the platen makes the HandKey easier to use

### HandKey ID3D-R Part Number: ID3D-R

- Field-proven hand geometry technology
- Integrates easily into new or existing systems
- Metal housing for extra security
- Recessed wall mount available
- Available in left hand configuration
- Available with integrated heater and enclosure – see outdoor options section

### FingerKey® DX Series Part Number: DX-2000, DX-2100, DX-2200, DX-2400

- High quality fingerprint reader with keypad and LCD
- Ideal for small user populations
- Durable optical sensor design
- Integrated proximity and smart card reader options
- Easy integration into new and existing electronic access control systems
- Configurable Wiegand output

**Blizzard®**  
**Part Number: ID3D-RW**

Ideally suited for the coldest climates and industrial environments, the Blizzard enclosure is constructed of heavy-gauge zinc-coated steel and features a weather sealed keypad, low-temperature display and heated interior. The Blizzard enclosure is a fully integrated unit and comes complete with HandReader ID3D and internal heater.

**Hurricane**  
**Part Number: HURCNE**

Constructed from high-impact ABS plastic, with a generous lid, the Hurricane enclosure offers protection from rain, and the contoured design facilitates water run-off. This enclosure has been designed so it can be added to an existing installation. When used with an integrated heater option (INT-HTR), it provides the ultimate solution for cold weather and exposure to the elements.

**Tsunami**  
**Part Number: TSNAMI**

For the harshest environments, the Tsunami enclosure is water sealed and built to NEMA type 4 standards. The HandKey is protected from both splashing rain and hose-directed water, making it an ideal solution for industrial and food processing areas where hose-directed water is used for cleaning. In addition, when used with a heater-equipped HandKey (INT-HTR option), the Tsunami enclosure can withstand the bleakest of environments.
