Calibu DVMR-10CD

he Calibur digital video multiplexer/recorder (DVMR) is ideal for applications where high-quality multiplexed digital recording is required and economy and ease of use are desired. The DVMR-10CD has an internal HDD (hard disk drive) that eliminates the need for outdated analog VCRs.

The DVMR-10CD improves playback picture quality and eliminates hours spent searching VCR tapes for critical events. Direct access to select events is done via a simple on-screen search menu and front panel controls. Search by alarm, time, date, camera or cash register/ATM text. No PC or complicated software is needed. With optional DAT, AIT or CD-writer digital recording accessories, continuous recordings, images and clips can be archived automatically for days, weeks or longer.

The DVMR-10CD is set up through Quick-Set[™] on-screen menus. Record and playback functions closely emulate a security VCR, so operation is intuitive. There are no new technologies to learn.

The DVMR-10CD. Exceptional quality digital recording, multiplexer functionality, automation, internal and external digital archiving, and easy setup and use.
