If not, you're not. Want to add a little iRobot intrigue to your house not to mention convenience and foolproof security? The KB2000 is America's hottest selling biometric door lock, which retails states side for $599.99

5 Latch International Mortise Lock - Now Available in Silver or Gold Finish

Features

- **Convenient One-Touch System**

  Simply touch the sensor with your fingertip, acceptance or rejection occurs in less than 1 second. An optional password function allows for extra security with convenience. High-Security override key also supplied.

- **Safety First Design**

  KB2000 is designed to comply with the global Fire and Safety regulations. The door can always be opened from the inside providing a quick exit in case of an emergency or fire. The L shaped lever reduces the chances of clothing or other items getting hung.

- **Easy-to-Operate Key Pad**

  User registration, deletion, and mode programming are done through the keypad. Simple and quick, does not require any special skill or training.

- **Remote Branches**

  Built-it infrared Remote sensor enables other audio-video security apparatuses to be interfaced with the lock.

- **Remarkable Durability**

  The scanner prism - The optical prism is high-impact resistant. Sensors, optimally designed incorporating high resolution and strong endurance. It will resist vandalism: Physical impacts/ hammering and scratches. Even chemical corrosion, ESD, and can be adapted for outside use under severe environmental conditions.

- **Memory Capacity (up to 99 fingerprints)**

  KB2000 has a memory capacity of 99 fingerprints with high speed enrol and delete function. A special feature of this lock is that a single user can be deleted on the lock, without a need for PC support.

- **Safety Dead Bolt**

  The lock incorporates a safety bolt knob inside to manually lock the door to prevent anyone from opening from the outside.

- **Power Supply**

  KB2000 is powered by 5 AA 1.5V alkaline batteries. The power consumption is extremely low and it can support 4000 operations. For a typical family these batteries will last 6-12 months. Do remember to use high performance long life alkaline batteries.

- **Low Power Alarm**

  Audible warning reminds to replace the batteries.

- **Back-up Power Supply**

  There is an external power supply socket beneath the key pad for back-up purpose. In case of low battery you can plug in a standard 9 Volt battery into this socket and KB2000 will allow you to unlock the door by inputting the approved fingerprint or the preset PIN code. Security key can also be used in case of emergency.

- **Anti-Tamper and Malicious Operation**

  If a wrong fingerprint attempts access on more than five consecutive occasions, the system will be immobilized for 5 minutes to protect against malicious operation of the lock.

- **Modern Appearance and Advanced Biomechanical Design**

  Aesthetically-pleasing, the KB2000 combines a modern appearance with a futuristic biomechanical design.

- **Warranty**

  The KB2000 is sold with a 12 month manufacturers warranty covering parts and labour, as well as our 14 day, no-quibbles exchange policy if the product arrives DOA. Please read our warranty information.
