KEY FEATURES

▶ Smart IR II (Combining the High Beam and Low Beam to adjust IR intensity to fit different lighting conditions.)
▶ P2P (Remotely access the camera using 5G network via P2P with hassle-free setup and easy connection.)
▶ HLC (High Light Compensation. Improving image visibility under strong light sources.)
▶ Defog (Defog technology. Restoring clear images in hazy and foggy weather.)
▶ Integrated Cable Management (Combining the power interface, PoE port, and other interfaces in the base neatly.)
▶ 256G (Supporting ultra-large external microSD/SDHC/SDXC card storage up to 256G.)
▶ Smart Stream (Bandwidth, storage and bit rate are saved with Smart Stream On, eg, H.265$^+$ saves 70%~80% bandwidth that of H.264.)

5G Technology

Camera responsiveness and real-time monitoring can be greatly enhanced by the larger bandwidth and lower latency of 5G networks, not to mention a leap in ultra-high-definition video or images. The 5G camera comes with its 5G cellular module, which is fit for some scenarios where wiring is inconvenient, and its higher performance of mobility, security and coverage also bring new opportunities for the industry.

AI Video Analytics

• 8 intelligent VCA modes powered by AI engine, which can intelligently filter objects to focus on human and vehicle detection.
• People Counting technology provides high accuracy and real-time data based on AI algorithm with statistic reports.
• Face Detection function detects human faces in the monitoring scene and captures the snapshots, which greatly enhances the monitoring efficiency.

30fps@4K

Providing 4K HD resolution with frame rate of 30fps, the camera performs well in catching detailed image regardless of the moving speed.

Easy Deployment and Compact Structure

5G antenna is built outside the camera and the 5G module is directly merged inside the camera. By inserting the SIM card, you can monitor in places where network wiring is not convenient. Versatile interface and integrated junction box ensure installation neat and tidy.
