

IP MIGRATION MADE SIMPLE

NVT COAX MEDIA CONVERTERS DATA SHEET

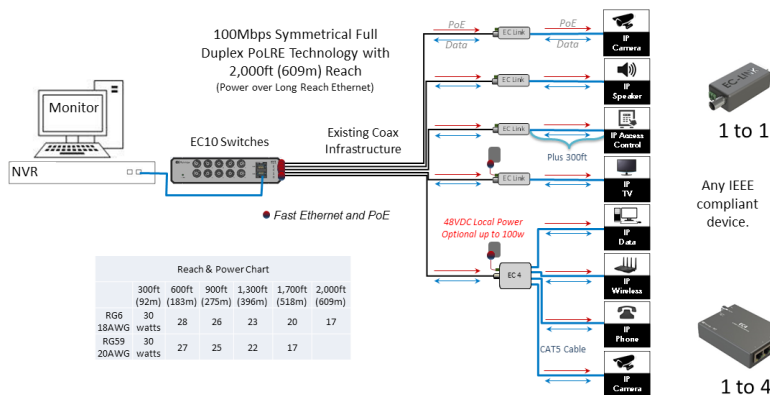

MEDIA CONVERTER TO EXTENDER

The EC-Link and EC4 media converters support the IP end points leveraging the CLEER or EC10 switches. In addition, the EC-Link can be easily converted to become an Ethernet extender, with an EC-Link at the base unit and an additional media converter - either another EC-Link or EC4 - at the other end.

If required, the media converters can be locally powered to deliver additional power to the IEEE compliant IP end point.

EC-Link and EC4 Connected to the EC10 Switch

Media Converters

At-a-Glance

The EC-Link and EC4 are energy-efficient media converters for the CLEER and EC10 switches.

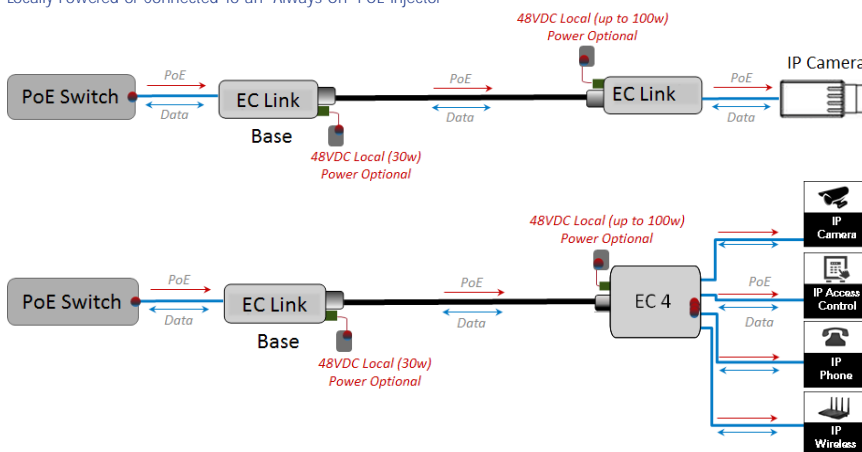

In addition, the EC-Link can be easily converted to become an Ethernet extender.

Advantages

- Quick, easy and cost effective IP migration
- Energy efficient, consuming less than one watt of power per EC-Link
- EC-Link can become an Ethernet extender and paired with another media converter (EC-Link or EC4) to create a single run solution
