Scantronic

# 660 SPEECH DIGITAL COMMUNICATOR

COMMUNICATORS

The 660 is a wire-in auto dialling speech/digital communicator unit, designed to be discreetly fitted in a Scantronic, or any other manufacturer's alarm control panel.

Should you wish to have your premises monitored by family, friends, neighbours, company members or a remote monitoring centre, the 660 offers a wide variety of choices, tailored to suit your specific budgetary and installation requirements.

The Speech Communicator option is programmed via a DTMF touch-tone telephone and is capable of sending 4 pre-recorded voice messages to family, friends, neighbours, company members' etc over the telephone line. The voice message has one, eight-second master message, normally used to record your name and address and up to four, three-second secondary messages. These are normally used to indicate the type of incident e.g. personal attack, burglary, fire etc.

The Digital Communicator option is programmed via a DTMF touch-tone telephone using the advanced programming function. This will allow the communicator to be received in Scancom Fast Format Remote Monitoring Centres.

The Scantronic 660 offers a wide variety of choices should you wish to have your premises monitored, providing enhanced security to your alarm system, giving you total peace of mind.

# 660

## SPEECH DIGITAL COMMUNICATOR

### TECHNICAL SPECIFICATION
