

# Weapons management solutions

Fully audited and automated gun and ammunition lockers

## Who we are and what we do

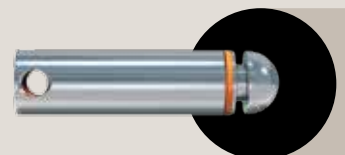

Traka is a world leading manufacturer of bespoke asset management solutions for high security applications. Our automated systems manage your high risk valuable assets for you, while providing a total audit of all transactions.

Traka securely houses ammunition and guns, including pistols, rifles, SMG's and hand guns, in locked compartments that can only be accessed by authorised users. Guns are never exposed and each locker remains closed and locked.

An electronic record is kept each time you identify yourself to the system. It records the time you accessed the lockers and which gun you took. When the equipment is returned, you identify yourself again and the system will record that you physically returned the item and at what time.

## Intelligent weapons lockers

- curfews and alarms can be set if items are not returned on time
- negates the need to manually sign out arms
- keeps a record of who took what equipment, at what time
- unique RFID technology confirms whether equipment was returned or not
- arms cannot be accessed without first identifying yourself via Smart Card, PIN, Biometrics or Prox Token
- can be fully integrated with your current access control systems
- users are fully accountable for the arms in their possession – increasing responsibility
- reduced loss and damage to assets

# Intelligent asset management

## Key Vending

- Controlled access to authorised keys for staff and officers
- Automatically vend keys from a secure software controlled cabinet
- Individual staff recognition ensures unique access permissions
- Segregate operational and non-ops keys
- Audit and account for every key set 24/7 365 days per year
- Automatically alert and notify should a key not be returned on time
- Integrate with your access control system to ensure staff can't leave site without first returning their keys

## Radio Vending

- Many of the benefits of key vending are also applicable to radio vending
- Automatically vend radios from a secure software controlled locker
- Radios are available 24/7, to authorised staff only
- Handsets are securely stored and accounted for, when not in use
- Staff are individually accountable, resulting in fewer losses and less damage
- RFID tagging ensures every radio is uniquely identified and managed
- Integrated battery charging ensures handsets are always ready for use

## Fleet Management

- Prevent unauthorised staff from driving fleet and specialist vehicles
- Always know exactly who was driving each vehicle and when
- Report on mileage, fuel, hours used and even where the vehicle is parked
- Enforce alcohol testing for drivers before their vehicle keys are released
- Vehicle defects reported by the user automatically generate alerts to the service team and can lock-out access to vehicles with faults

## Asset Management

- Ideal for Tasers, data terminals, cameras and specialist equipment
- Manage, control and account for the use of shared portable equipment
- At all times know who has, or who previously used, portable pool equipment
- Deposit important paperwork, making it readily available 24/7 to selected staff
- Use our software to manage, control and report on usage, with confidence
- Automated vending from a fully audited system
