

180 Degree Vision

The V1000 multi-sensor camera series provides a high-resolution panoramic 180° view. The fixed dome camera consists of four (4) camera modules (sensors) that work together to offer a view that is perfect for large areas such as airports, perimeter security and city surveillance. The modules are either 2 MP or 5 MP each, to create 8 MP and 20 MP models. Both models include IR illumination that increases visibility in low-light environments.

Overview

The multi-sensor series provides triple-streaming video and supports H.264/H.265 compression technology, significantly reducing file sizes and conserving valuable network bandwidth. The camera provides motion and tampering detection as well as Smart Encoding, which monitors the amount of motion in a scene, resulting in additional savings in storage requirements and bandwidth without sacrificing video quality.

Product at a Glance

- ▶ 8 megapixel and 20 megapixel versions; progressive scan CMOS sensor
- ▶ Includes four separate camera modules (2 MP or 5 MP) that combine for one IP address output
- ▶ The exposure settings for each camera module can be configured independently
- ▶ H.265/H.264 compression
- ▶ Smart Encoding
- ▶ IR illumination; effective distance 90 ft (30 m)
- ▶ High-resolution 180° panoramic coverage
- ▶ Triple streaming
- ▶ Video Content Analysis - VMD and tampering
- ▶ 1 alarm input, 1 alarm output
- ▶ Two-way audio; 1 audio input, 1 audio output
- ▶ True Wide Dynamic Range (T-WDR)
- ▶ SD card slot
- ▶ Powered by PoE+; 12 VDC; 24 VAC
- ▶ Indoor/outdoor; vandal-resistance rated IK10; weatherproof IP66 rated

The multi-sensor cameras are designed for indoor/outdoor security installations. An IR cut filter provides low light sensitivity. The housing is IK10 rated for vandal protection and IP66 for weather resistance.

Installation of the cameras is made easy and cost effective with Power over Ethernet (IEEE 802.3at), which eliminates the need for power cables; 12 VDC and 24 VAC are also accepted.

The camera can be used with Vicon Valerus™ as well as many other popular VMS systems; each VMS may support different camera functions.
