

MCT-350

ZigBee Wireless Magnetic Door/Window Sensor

Features that Make a Difference:

- Ideal for protecting doors and windows
- Fits any window/door type and décor
- Best for large magnetic gap applications
- ZigBee HA 1.2 and OTA support
- Temperature sensing
- Front cover tamper protection
- Easy installation and maintenance
 - Easy to install and remove
 - Battery life of 5 years (with typical use) with coin-sized battery
 - Low-battery alert
 - Simple user battery replacement process

The majority of home and business owners, according to polling, see smart home capabilities as an extension of their safety. That's why millions choose to use our advanced ZigBee intrusion detection devices as part of their smart home and business solution.

Tyco is pleased to introduce the MCT-350, a fully supervised compact ZigBee wireless magnetic contact transmitter designed primarily for

protecting doors and windows. Offering superior performance and battery life, its durable capabilities support installations where a large magnet gap is required. The MCT-350 is fast and easy to install and requires very little maintenance due to its user friendly, no tools required battery replacement process.

The MCT-350 is also designed to harvest environmental data that can be sent to smart home systems.

Specifications:

Wide Magnet Gap	Over 31.75 mm / 1.25 in
Supported Network	ZigBee H.A 1.2, OTA firmware upgrade support
Frequency	2.4 GHz as per IEEE 802.15.4
Battery Type3V Lithium CR2450; Panasonic only
Nominal Battery Capacity620 mAh
Battery Life5 years (for typical use); offers user friendly replacement process without the use of tools
Tamper Alert	Front tamper protection; reported when a tamper event occurs
Operating Temperature	0°C to 49°C / 32°F to 120°F
Operating Environment	Indoor
Dimension (L x W x H)	59 x 29 x 11 mm / 1.6 x 0.9 x 0.4 in
Weight (including battery)20 g / 0.7 oz
